#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 1 – 15 have been presented for examination.

### *Election / Restrictions*

2. This application contains claims directed to the following patentably distinct claimed inventions. Restriction to one of the following invention is required under 35 U.S.C 121:

- I. Claims 1 – 10 drawn to a method for intrusion detection by monitoring data, rearranging the parameters and providing a default data parameter address which is then used by the protected program software; and enabling the execution of the embedded software if the extracted parameter data is correct and prohibiting the execution of the embedded software if the extracted parameter data is incorrect, classified in class 726, subclass 23.
- II. Claims 11 – 15 drawn to a method for stored data protection by merely moving the data parameters from the RAM over to the NVRAM and then clearing the data parameters in the RAM, classified in class 713, subclass 193.

3. Inventions I and II are related as combination and subcombination disclosed as usable together in a single combination. The subcombination is distinct from the combination if it is shown to be separately usable. The following case instantiates:

Invention I provides a method for intrusion detection by monitoring data, rearranging the parameters and providing a default data parameter address which is then used by the protected program software; and enabling the execution of the embedded software if the extracted parameter data is correct and prohibiting the execution of the embedded software if the extracted parameter data is incorrect and as such having the protected program software to extract and decode the data parameters from the rearranged data parameter address to recover the initial contents of the parameters.

Invention II provides a method for stored data protection by merely moving the data parameters from the RAM over to the NVRAM and then clearing the data parameters in the RAM.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Longbit Chai whose telephone number is 571-272-3788. The examiner can normally be reached on Monday-Friday 8:00am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz R Sheikh can be reached on 571-272-3795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
